

Digital Adaptive SAT

What is adaptive testing? How does it work?

An **adaptive test** calibrates to the student's skill level to **zero in on a score** more quickly. On the digital SAT & PSAT, each section is split into **two modules**. How you do on the first set of questions determines the **difficulty level** of your next module.

FORMAT

- 32 minutes | Reading & Writing Module 1 (mixed difficulty)
- 32 minutes | Reading & Writing Module 2 (higher *or* lower)
- 10 minutes | Break
- 35 minutes | Math Module 1 (mixed difficulty)
- 35 minutes | Math Module 2 (higher *or* lower)
